

Business Systems and Quality Policy

BAM's business systems and quality support, profitability and long-term growth is by meeting the requirements of our repeat and new business customers across all the markets in which we operate.

BAM's principal aims are to:

- Continually improve our commercial and technical performance.
- Develop staff potential through career opportunities and training.
- Promote a real commitment to providing a quality product, successful handover and aftercare.
- Consistently achieve best practice by team working, collaboration and knowledge sharing.
- Have a real understanding of our customers and their business requirements.
- Strengthen working relationships both internally and externally.
- Procure work not solely on price but by offering innovation and added value.

Everyone working for BAM has responsibility for ensuring that the quality of their own work, and the work of the people they supervise, meets the minimum requirements set out in the company's 'Best Practice Manual', guidance notes and project management plans.

BAM is fully committed to continually reviewing and improving its business and quality management systems and ensuring compliance with all statutory and regulatory requirements.

The business systems and objectives will be communicated, reviewed and audited through the operational business and support department structure.
